

THERMOLEC

TMB BOILER

High Performance, Compact Design

The Thermolec TMB electric boiler is our newest and most affordable model. Without compromising quality, Thermolec has engineered the TMB boiler with quality components and state of the art technology. Designed for all types of hot water heating systems, including applications requiring 190° water temperatures. Ideal for either single or multiple zone applications, the TMB boiler outshines gas boilers in many applications by offering a lower total installed cost, more precise heating with low range BTU output capabilities and less maintenance.

Take advantage of low electric rates available in many areas throughout the US, often resulting in reduced heating costs versus propane or fuel oil boilers.

Outdoor Sensor and Supply Water Temperature Reset

The outdoor reset control proportionally varies the hot water temperature when the outdoor temperature is between +14°F and +50°F. The result is improved comfort and energy savings on mild days.

Limited Warranty

10 years on elements and tank, 2 years on all other components.
